## **Hurley Urgent Care- Lapeer is offering COVID-19 Viral & Antibody Testing**

**A VIRAL TEST** is available for people of all ages who have current symptoms of COVID-19 infection. The viral test is a nasal swab.

Lab results are usually available within 1-2 days.

**An ANTIBODY TEST** shows that you may have had the virus at some point in the past. Antibody testing is available for adults (12 & over) that believe they've been previously exposed to the COVID-19 virus, but may not have been tested. The antibody test is a blood draw and will check whether or not your body has produced antibodies.

Lab results are usually available within 1-2 days.
